.....

until, if applicable (dd.mm.yy)

.....

Physicians Name, speciality and contact details
(printed or stamp / not hand written)

Approval to physician completing a "Fit to slide" Approval Document

The athlete has had a crash, after which he had been declared unable to go back to sliding and therefore has been blocked from sliding within the IBSF e-license and registration system.

Before resuming to slide the physician should check:

- locomotor function
- ECG, pulse, blood pressure and heart sounds
- vision and normal visual fields
- neurological function
- history of epilepsy or syncope
- history of repeated or prolonged concussion episodes

- In case of status following concussion symptoms, use of assessment tools is recommended, e.g. SCAT5 questionnaire / ImPACT baseline/post injury testing

If the above findings are ok, please complete the "Fit to slide" Approval Document.
